CHAPTER XIV. THE PIOCONS OF DOST.

It was, imleed, in itself a great honor for Cornelius Van Baerle to he confined in the same prison which had once received the learned master Grotius.

But, on arriving at the prison, he met with an bonor even greater. As chance would have it, the cell formerly inhabited by the illustrions Barneveldte kappened to be vacant, when the cleinchcy of the Prince of Orange sent the tulip-fancier Van Baerle there.

The cell had a very bad character at the castle, since the time wher Grotins, had fallen so sweetly on bis heart at the by means of the device of his wife, made cheet, which the jailers forgot to examine. On the other hand, it seemed to Van Baerle au auspicious omen that this very cell was assigned to him; for, according to his kleas, a jailer ought never to have given to a second pigeon the cage

from which the first had eo easily flown. The cell had an frietorical character. We will only state here that, with the exception of an alcove, which was contrived there for the use of Madame Grotius, It differed in no respect from the other cells of the prison; only, perhaps, it was a little higher, and had a eplendid view

from the grated window. Cornelius felt himself perfectly indifferent as to the place where he had to lead an existence which was little more than vegetation. There were only two 1bings now for which he cared, and the possession of which was a happiness enjoyed only in imagination.

A flower and a woman, both of them, as he conceived, lost to him forever.

Fortunately the good doctor was mistaken. In his prison-cell the most adventurous life which ever fell to the lot of any tulip-fancier, was reserved for him.

One morning, whilst at his window, inhaling the freeh air which came from the river, and casting a longing look to the windmills of his dear old city Dort, which were looming in the distance behind a forest of chimneys, he saw flocks of pigeons coming from that quarter, to perch fluttering on the pointed gable ends of Loevertein.

Theae pigeone, Van Baerle said to himself, are coming from Dort, and consequently may return there. By fastening a little note to the wing of one of these pigeons, one might have a chance to eeud s meseage there. Then ufter a few moments consideration, he exclaimed .-

"I will do it." A man grows very patient who is twenty-eight years of age, and condemned to a prison for life, that is to say, to something like twenty-two or twenty-three

thousand days of captivity. Van Baerle, from whose thoughts the tbrce bulbs were never absent, made a enare for catching the pigeons, bating the birds with all the resources of his kitchen, euch as it was, for eight stirers (sixpence English) a day; and, ufter a month of unsuccessful attempts, he at last caught a

This it went on for fifteen days, at first to the disappointment, and then to the

great grief of Van Baerle. On the sixteenth day, at last, she came back without it.

Van Baerle had addressed it to his nnrae, the old Frisian woman; and implored any charitable soul who might find it, to convey it to her us safely and speedily as possible.

In this letter there was a little note in closed for Rosa.

Van Baerle's nurse had received ille letter in the following way:

Leaving Dort, Mynheer Isaac Boxtel had abandoned not only his house, his servants, his observatory, and his telescope, but also his pigeons,

The servant baving been left without wages, first lived on his little savings, and then on his master's pigeons. Seeing this, the pigeons emigrated from

the roof of Isaac Boxtel to that of Cornelins Van Baerle.

The nurse was a kind-hearted woman. who could not live without something to love. She conceived an affection for the pigeone which had thrown themselves on her hospitality; and when Boxtel's servant reclaimed them with culinary intentions, having esten the first fifteen already, and now wishing to eat the other fifteen, she offered to buy them from him, for a consideration of six etivers per head.

This being just double their value, the man was very glad to close the bargain, and the nurse found herself in undisputed possession of the pigeons of her master's envious neighbor.

The note, as we have sald, had reachd Van Baerle's nurse.

And also, it came to pass, that one evening in the beginning of February, able to hold your lantern with it. ust when the stars were beginning to twinkle, Cornelius heard on the staircase of the little turret a voice, which thrilled through him,

He put his hand on his heart, and listened.

It was the sweet harmonious voice of

Let us confess it, Cornelius was not so stupefied with surprise, or so beyond simself with joy, as he would have been, lint for the pigeon, which, in answer to his letter, had brought back hope to him under her empty wing; unil, knowing Rosa, he expected, if the note had ever reached her, to hear of her whom he oved, and also of his three darling bulbs.

He rose, listened once more, and bent forward toward the door.

Hague. The question now was, whether Rosa,

who had made the journey from the Hague to Lœuvestein, and who-Cornelins flid not understand how-had succeeded even in penetrating into the prison, would be fortunate enough in penetrating to the prisoner himself.

While Cornelius, debating this point vithin himself, was building all sorts of castles in the air, and was etruggling beween liope and fear, the shutter of the grating in the door opened, and Rosa, earning with joy, and beautiful in her pretty national costume-lut still more heautitul from the grief which for the last five months had blanched her cheekspressed her little face against the wiregrating of the window, saying to him,-

"Oh! Sir, sir, here I am !" Cornelius stretched out his arms, and looking to heaven, attered a cry of joy,-

"Oh. Rosa, Rosa!" "Hush! let us spenk low; my father ollows on my heels," said the girl. "Your tather?"

"Yee, he is in the courfyard at the bottom of the staircase, receiving the instructions of the Governor; he will presently come up."

"The Instractions of the Governor?" "Listen to me, I'll try to tell you all in few words. The Stadtholder has u country-house, one league distant from Leyden, properly speaking a kind of large dairy, and my aunt, who was his nurse, has the management of it. As eoon as l received your letter, which, alas! I could not read myself, but which your housekeeper read to me. I hastened to my aunt; there I remained until the Prince should come to the dairy; and when be came, I asked him, as a favor, to allow my father to exchange his post at the prison of the Hague with the jailer of gust. "llere is my father," she said Rosa then abruptly drew back from the door, and ran to meet old Gryphus, who made his appearance at the top of the staircase.

Aud thus opening the door, he began in the dark to talk to the prisoner.

The dog, on his part, went up to the prisoner, and growling, smelled about his legs, just as though to ask him what right he had still to be alive, after having left the prison in the company of the Recorder and the executioner.

But the fair Rosa called him to her

"Well, my master," said Gryphus, holding up his lantern to throw a little light around, ''you see in me your new jailer. I am head turnkey, and have all the cells under my care. I'm not vicious, but I'm not to be trifled with, as far as discipline

They keep sober, spend nothing, and have their beads always clear to make conspiracies. But I tell you, at the very outset, it won't be such an easy matter for you to conspire. First of all, you will have no books, no. paper, and no conjuring book. It's books that helped Mynheer Grotius to get off." "I assure you, Master Grypbus," replied Van Baerle, "that if I have enters tained the idea of escaping, I most decid-

Whilst giving utterance to this illnatured promise, Gryphus put his head out of the window to examine the nest. This gave Van Baerle time to run to the door, and squeeze the leand of Rosa, who whis-

But he refused to make the modification, and after everything was got ready, he actually whisked the party over the track at the rate of thirtytive miles per hour. FROM SULPHER SPRINGS.

SELFHUR SPRINGS, KY., Nov. 5. EDITOR HERALD:-It was my lot today to witness the sad hurial scene of Mrs. Charles Massie, sr. and daughter, who died from the effects of poison, the victims of some fiend, to whom the sweet and tearful face of mercy should become livid with eternal hate, and heaven's golden gates forever closed as he becomes an immortal outcast, and gloom of hell. Some three or four days ago the family of Mr. Charles Massie, sr., who lives in Fordsville prewas agreed by the attending physicians to be caused by poison, which in a few hours, despite all medical attention, caused the death of his son, who was next day the wife and daughter, who died wthin five minutes of each other. filled with the most deadly poison, remain unknown until the tlay of all was singing, "I am lonely to-night There is a despicable mud hole near accounts. Terrible indeed must be the thoughts of the murderer, as he knows his innocent victims are placed in their narrow homes. Wretched indeed must be his blood stained soul as he invokes the mantle of forgetfulness to fall upon him and blot out the crime, a crime that would forever blacken the character of a devil, or was ever a devil guilty of such savagery. He will only reap his reward when death allows perdition to elutch his helpless soul and punish it in eternal flames. BILL PERKINS.

REPRESENTATIVE AND CHAMP-10% OF AMERICAN ART TASTE

PROSPECTES FOR 1875-BIGHTH YEAR.

THE ALDINE THE ART JOURNAL OF AMERICA,

ISSTED HONTRLY,

A MAGNIFICANT CONCEPTION WON'S DERFULLY CARRIED OUT.

The necessity of a popular medium for the representation of the productions of our great arilets has always been recognized, and many attempts have been made to meet the want attempts have been made to meet the went The successive failures which have so invariably followed each attempt in this country to establish an art journal, did not prove the indifference of the people of America to the claims of high art. So soon as a proper appreciation of the want and an ability to meet it were shown, the public at one rallied with enthusiasm to its support, and the result was a great aristic and commercial trinkingh—THE ALDINE.

The Aldina white issued with all of the regularity, has none of the temporary or timely interests characteristic of ordinary periodicals. It is an alegant miscellany of pure, light, and terests characteristic of ordinary periodicals. It is an alogant miscollany of pure, light, and graceful literature, and a coffection of pictures; the rarest collection of artistic skill, in black and white. Although each succeeding number affords a fresh pleasure to its friends, the reaf vaina and beauty of The Aldina will be most appreciated after it is bound up at the close of the year. While other prinite at the close of the year. While other prinite with rivals of

the year. While other priniteations may claim superior cheapness, as compared with rivals of a similar class. The Aidine is a migua and original conception—alona and unapproached—absolutely without competition in price or character. The possessor of a complete vortume cannot duplicate the quantity of fine paper and engravings in any other shupe of number of voiumes, for ten times its cost; and then, there is the chromo, besides?

The national feature of The Ald no must be taken in no narrow sense. True art is convent. taken lu no nerrow sense. True art is cosmo-politen. While The Aldine is a strictly Ameri-ran institution, it does not confine itself to the ran institution, it does not confine itself to tha peproduction of native art. Its mission is to celltivate a broad and appreciative artissts, one that will disoriminate on grounds of intrinsio merit. Thus, whila piending before that petrons of The Aldine, as a leading characteristic, the productions of the most noted American artists, sttonilon will always be given to speciment from foreign masters, giving mheribers all that pleasure and lastraction obtainable from home or foreign sources.

pleasura and instruction obtainable from home or foreign sources.

The artistic illustration of Amorican reenery original with The Aidine is an important feature, and its magnificent plates are of a size more appropriate to the satisfactory treatment of details than can be afforded by any infarier page. The indicious interspersion of landscape, marine, figure and animal subjects, sustain an annaheted interact, impossible where the score marine, figure and animal rubjects, snetain an unahated interast, impossible where the scope of the work confines the artist too closely to a single style of subject. The literature of The Aldine is a light and graceful accompaniment, worthy of the artistic features, with only such technical disquisitions so do not interfare with the popular interest of the work.
